

CABTRAC Committees

CABTRAC has established five committees tasked with pursuing the latest trends in cancer research training to bring innovative and leading information to CABTRAC members. Their primary goal is to organize and facilitate annual retreat speakers, sessions and workshops. Additionally, the committees contribute to white paper publications, advocacy letters to the National Cancer Institute, and other theme-based projects. Committee chairs and co-chairs are members of CABTRAC's executive committee, reporting to the board of directors.

CABTRAC members are encouraged to attend the committee meeting of their choice at the annual retreat: **Monday, October 29 at 7:00 am during breakfast in the Gold Room.** Please feel free to contact the committee chairs with questions or comments before, during or after the retreat.

Curriculum Development Committee

Advancing pedagogy and curriculum best practices

Steven J. Triezenberg, Ph.D.
Committee Chair
steve.triezenberg@vai.org

The Curriculum Committee at this meeting will look at the recent National Academies Press report on "Graduate STEM Education in the 21st Century," and explore its implications for cancer biology programs in particular.

Enhancing Diversity Committee

Addresses diversity and minority issues related to recruiting, mentoring, training, etc.

Janet V. Cross, Ph.D.
Committee Chair
jvc5b@virginia.edu

Institutional Training Grants Committee

Explores grant opportunities at and beyond the T32

Adrienne D. Cox, Ph.D.
Committee Chair
adrienne_cox@med.unc.edu

Medical School Curriculum Committee

Aims to bridge cancer-related training between medical/clinical and basic science curricula

Bryan G. Allen, M.D., Ph.D.
Committee Chair
bryan-allen@uiowa.edu

Post Doc Training Committee

Addresses issues specific to the training of postdoctoral fellows

James J. Manfredi, Ph.D.
Committee Chair
james.manfredi@mssm.edu
