CANCER
BIOLOGY
TRAINING
CONSORTIUM

Frank was a visionary.....benefit the next generation of cancer researchers across the US for years to come.

Lynn Matrisian, PhD, MBA
Chief Science Officer, PanCAN

Frank was always about the future, never about the past. He was always about building, never about status quo. He was always about others, never about himself.

Dario C. Altieri, MD
**President and Chief Executive Officer, The Wistar Institute
and Director, Caplan Cancer Center**

He inspired us to work with each other, and subsequently with representatives from the NCI training branch, to develop the best training environment for the next generation of cancer researchers. The ongoing success of CABTRAC.....is a testament to Frank's foresight and inspiration.

**James Broach, PhD, Distinguished Professor and Chair,
Department of Biochemistry and Molecular Biology,
Penn State University, Penn State Cancer Institute**
